PROJECTS

COLLEGE MANAGEMENT SITE

The college provides a complete system of student management software. It manages the entire campus operations and administration. It provides an interactive platform for all college stakeholders like Students, Teachers, Parents, administrators, and Management needs in a personalized way.

ATM Interface In Java

We can create an ATM program for representing ATM transactions. In the ATM program, the user has to select an option from the options displayed on the screen. The possibilities are related to withdrawing, depositing, checking the balance, and exiting.

E-Commerce Web App

It is an e-commerce website that sells electronic items and other essential things. This e-commerce web app has all the required functionalities and features like register, login, forgot password, and reset password along with a user and admin dashboard. JSON Web protects users' data.
